Becky – sharing with you and your staff as it will be part of the discussion on Thursday I believe.

Thank you,

**Lynn M. Juett**

**Subject:** Shuttering memo for WLLS

All, I have attached the following memo outlining the schedule for shutting down the

current ambient air monitoring effort at WLLS. The email is a quick summary, the attachment list all points.

1) Demobilize AreaRae / Radiello / E-perm equipment from monitoring locations, but leave gamma tracers/TLD monitoring in place. **April 2015.**

2) Continue outdoor ambient air monitoring at Spanish Village Park (SVP). **April – June 2015.**

3) Shutter outdoor ambient air monitoring and demobilize from Westlake Landfill Site. **June 2015.**

### **Current EPA air sampling strategy, methodology and discussion:**

An air monitoring network was established around the WLLS. The original goal of collecting air monitoring to be used as a baseline against which to measure air quality during future on site construction activities has been met. The future proposed start date for construction of an onsite barrier is currently unknown. Therefore, EPA amended its air monitoring and sampling network approach down to sampling only for radiological parameters at the Spanish Village Park (SVP) location (April 2015).

### **Administrative cost:**

The recurring (weekly) expenses for START at West Lake are primarily labor and analytical expenses: Labor includes the cost for principals, scientist, engineers, technicians, admin staff, etc. Analytical includes equipment, supplies, analytical measurement & analysis at each station, now down to one station at SVP. Expenditures to date (05/15/2015) are approximately \$705,567.00.

### **Actions – shutdown process:**

In order to comply with EPA decision document (WLLS Update February 12, 2015) and RA's comments, the proposed actions will be implemented:

### **Data / Instrument collection schedule:**

- TLD's – last period for sampling is May 2015, collect last run on 5/28/15.
- Air filter – last period for sampling is May 21, collect last run 5/28/15.
- Radiello – last period for sampling is May 21, collect last run 5/28/15
- No data to be collected after 5/30/15.

**Instrumentation / inventory:**

- All equipment inventoried and off-site NLT 6/26/16
- All bills paid, power, internet turned off, porta-john, hand-washing station and trailer off-site NLT 6/30/15.

**Reports schedule:**

- Interim data report from 1 Jan – 1 April 2015 due to NLT 5/30/15.
- Final reports on analytical, measuring and monitoring data from May 2014 – June 2015, NLT 7/31/15.
